Endoscopic Photography and Videography

We have offered this unique device capability since late 2021. What is Endoscopic Photography and Videography? Think as a borescope or inspection camera. Simply put - it's a powerful .25" multi-function camera at the end of a cable, or "snake".

Do you have evidence, or need a search and inspection, in tough to reach – and see – places? Our mobile endoscopic / inspection camera can view inside areas traditional cameras cannot – from firearm barrels to small places in scenes and vehicles – even water locations. Images are captured in high-resolution JPEG; video is also available.

- Search, find, and inspect hidden evidence before removing wall panels, furniture, vehicle interiors, and other places.
- Document discovery evidence as found, assess any potential hazards and dangers, and clear unseen areas before entering.
- All Endoscopic Photography and Videography assignments include: 1) Assignment Report and Photography / Video Log; 2) Original Files and Duplicate Files Renamed to the Assignment; and 3) Contact Sheet of All Photographs with Name, Date & Time Stamp. Scene Diagrams are completed as appropriate.

We are available to fully document any size and location scene – indoors and outdoors, motor vehicle collision locations, involved motor vehicles, reported crime scenes, and evidence inspections.

Contact us to schedule a complimentary initial consultation for your case – associates@DeathCaseReview.com
